

# Building A Path

## 2008 EAST Partnership Conference

Hot Springs Convention Center

February 19-21

## Leaving A Trail

**Environmental and Spatial Technology** (EAST) is an educational technology initiative - we're trying to make learning better. Better for students, better for teachers, and better for our communities.

EAST students perform service learning projects; they identify needs in their communities, and they work to provide innovative solutions for those needs. EAST students are unique in that they apply real world advanced technology to address real world issues.

### EAST Partnership Conference

is an annual gathering of 2000+ students from across America. The Conference spans 3 days and includes an exhibition hall showcasing student service projects, student breakout sessions on the latest in technology, a student awards banquet, and much more!
